4. **Other Tools :-** Postman, Figma, Docker, studio 3T, Azure

EXPERIENCE

- **Smart technica :-** 2+ years of experience in MERN stack

PROJECTS

1. **RedboxGlobal India**

   Developed a platform for real-time stock market updates, featuring live stock prices, AI-generated news, FII/DII ratio analysis, and F&O ban data. The app empowers investors with accurate insights and a user-friendly interface for informed decision-making.

2. **Atilerware**

   Ateliware is a platform that streamlines order booking, workforce management, and production control. It features automated reminders, customizable invoices, and production forecasting to ensure timely deliveries and customer satisfaction. Ateliware also offers analytics, prevents revenue leakage, and provides secure data access to optimize operations and enhance productivity.

3. **Kutuma**

   This parcel delivery platform connects senders with couriers through a bidding system. Users create orders with parcel details, and couriers place bids. Once a bid is accepted, the payment is securely held by the platform until delivery is verified. With built-in insurance, it ensures safe and reliable parcel delivery for both senders and couriers.

4. **Web Market**

   This platform provides a diverse range of templates, including Shopify, eCommerce, React, WordPress, and PSD designs. Users can preview designs, view live demos, and access code for seamless integration. With membership options, users gain access to premium templates and exclusive tools, making it easier to build stunning websites and applications efficiently.

5. **ParkVision**

   This parking management system utilizes OpenCV and ANPR technologies to automate vehicle entry and exit logging. It scans number plates, associates them with registered owner IDs, and prints entry details automatically. Designed for apartments with multiple buildings, the system ensures seamless tracking and efficient parking operations without manual intervention

6. **ReferralX**

   This platform lets users buy and sell coupons for various services. Buyers can find great deals, and sellers can list unused coupons. A secure chat connects the admin, buyer, and seller for smooth collaboration. Payments are held by the admin until the coupon is claimed, ensuring a safe and reliable process. With multiple categories, it's the perfect solution for managing coupons effortlessly.

7. **Errands**

   Errands Inc. is a 24/7 on-demand app connecting users with independent contractors to handle personal or business errands. It's a smarter, safer, and efficient way to get help instantly or on schedule, empowering people to save time and focus on what matters.
